EXPERIENCE A COMPLETE RELIEF LIKE NEVER BEFORE.

“Dedicated to Seeing Relief”
At Eye Eco your patients come first. We care about helping people feel better, naturally. Our priority is our product’s performance, our customer’s comfort and making a difference in people’s lives, one set of eyeballs at a time. It’s all we do, all we have ever done and what we commit to continue doing.

Your patients deserve products proven to improve their eye health. That’s why you can sleep well knowing that all of Eye Eco’s innovative products are natural, proven effective and backed by a satisfaction guarantee. Our Tranquileyes® goggles, Onyx and Quartz silicone sleep shields and Eyeseals™ are all manufactured and hand assembled in Temecula, California. Our skin products are also made in the USA.

Founded in 2003, Eye Eco gives back. Since the day we opened our doors we have worked closely with the Sjogren’s Syndrome Foundation, donating a percentage of our sales to finding a cure for the disease. This is who we are and will always be.

In this complicated world, it’s nice to know that Eye Eco, a company that strives to simply satisfy its customers and treat a chronic ailment, exists.

We believe that relief shouldn’t end with our product line.

Products that fit your patient’s lifestyle, technology that works.

Our industry has come a long way. The equipment available to diagnose Ocular Surface Diseases continues to improve, allowing for greater understanding of the patient’s condition and aiding physicians in prescribing effective treatments. Offering Eye Eco therapies in conjunction with other treatment options including Restasis, OTC lubricants, ointments, Omega supplements and lid cleansers, allow your patients to start managing their symptoms immediately while boosting practice profits.

Why Tranquileyes™?

Industry studies, including The International Workshop on Meibomian Gland Dysfunction, have shown applying effective moist-heat to the eyelids is beneficial for all levels of MGD. The key is having controlled heat (89–108°F, 31.67-42.22°C), duration (up to 20 minutes) and moisture to effectively melt the meibum while hydrating and relaxing the sensitive eyelid skin.

Our Tranquileyes™ goggles, when combined with pure warm water and our reusable gel pack technologies, allow patients to create soothing moist-heat compresses, ranging in temperature from 101–110°F/38.33-43.33°C and lasting up to 25 minutes. Below is a case study using the Oculus® Keratograph5M, which shows how effective a 20 minute Tranquileyes’ moist-heat treatment can be in improving tearfilm breakup time.

Additional Benefits of Tranquileyes™

- Controlled heat
- Doesn’t require a microwave (Instant)
- Hydrates the skin while loosening the meibum
- Patient can sleep with the mask
- Reusable and affordable (.28¢ – .30¢ per moist-heat application)
- Patient can create cold therapies
- Excellent customer service
- Distributed exclusively through doctor’s offices
- Average practice profit $15K/year
- Satisfaction guaranteed
- Doctor recommended
- Made in USA

Tranquileyes™ Case Study

A 35 year old female, working 8–10 hours in front of a computer screen in an air-conditioned office, complaining about dry eye discomfort was examined with the OCULUS® Keratograph5M before and after using the Tranquileyes™ XL moist-heat for 20 minutes. Here are the NIKBUT results for the right eye:

Moist-Heat Index

| Moist-Heat vs. Dry Heat |

**Moist-Heat**

- Loosens the oils in Meibomian Glands
- Penetrates deeply, hydrating the eyelid and surrounding skin
- Increases relative humidity to help stabilize tear film
- Promotes circulation
- Slows tear evaporation

**Dry-Heat**

- Pulls moisture away from the eye and sensitive surrounding skin
- Decreases relative humidity
- Increases instability of tear film
- Counter to anti-aging objectives for most women

**RELATIVE HUMIDITY/MOISTURE**

By adding warm water to our therapies, Tranquileyes™ increases relative humidity to 80-96% to stabilize tear film and deeply hydrate eyelid skin, promoting circulation and healing while leaving the eyes and skin hydrated.

**HEAT INTENSITY**

Both our Instant and Bead therapies offer heat conducting technology that produces temperatures of 101-110°F/38.33-43.33°C to loosen oils in the meibomian glands.

**HEAT DURATION**

Conventional products and remedies for dry eye only offer a few minutes of heat/moist-heat. Tranquileyes™ products offer 12-25 minutes of moist-heat which allows for improved patient comfort, regardless of MGD severity.

**COVERAGE**

Our XL kits offer maximum coverage for your eyes and surrounding tissue. This extended coverage not only replenishes moisture to your eyes, but also to the skin around your eyes, keeping your skin looking young and vibrant.

**The many levels of moist-heat and how it works**

--eyeeco.com | 1.888.730.7999 | Made in the U.S.A.
Moist-Heat and Cold Technologies

The Tranquileyes® system incorporates two reusable gel pack technologies to create moist-heat therapies and cold therapies. Both technologies have been proven to effectively improve tear quality by providing the intensity and duration of heat required while hydrating the sensitive eyelid and surrounding skin. We measure gram weight providing the intensity and duration of heat required while hydrating the sensitive eyelid and surrounding skin. We measure gram weight to ensure they achieve optimum performance.

thermoeyes® Beads

The Beads are made from glycerin and water. The Beads create moist-heat by being warmed in hot water. Moisture to increase relative humidity is provided by a fabric pocket which the Beads are placed into before being submerged in water and heated in the microwave. Once heated, the pocketed Beads are placed into the back of the goggle where they provide 12-25 minutes of moist-heat ranging 101–110°F/38.33-43.33°C. Each set of Beads can be reused approximately 60 times for moist-heat. They can also be placed in the freezer for creating cold therapies.

thermoeyes® Instant

The Thermoeyes Instant are made from sodium acetate, a non-toxic, food grade salt water. The Instant gel packs have a stainless steel disc inside. Heat is created by bending the stainless steel disc back and forth. The sound created by clicking the disc, changes the molecular structure from liquid to crystal, generating heat. Once activated, the gel pack is placed into the back of the goggle along with a moistened sponge, providing 15-25 minutes of moist-heat ranging from 102–110°F/38.89–43.33°C. The Instant technology can be reused up to 100 times for moist-heat. To reuse, the Instant gel packs need to be boiled in a continuous rolling boil between 3-5 minutes. The Instant technology can also be placed in the freezer (in their liquid state) to create cold therapies.

The charts below indicate the temperature retention and the percentage of relative humidity retention of our Tranquileyes® system. Using a hygrometer to measure the temperature and relative humidity, these tests indicate the Tranquileyes® system maintains the ideal balance for optimum performance. Eye Eco recognizes this evaluative process is essential to ensure our technologies do not exceed desired temperature levels, potentially burning the sensitive eyelid skin. Below are performance charts for our four technologies: Instant, Instant XL, Beads, Beads XL.

Moisture Beads

Relative Humidity 86%-96%

30 Seconds in Microwave

131-147°F, 55–63.89°C

Flaxseed Mask

Relative Humidity 55%-82%

15 Seconds in Microwave

80–95°F, 26.67–35°C

Other Over-The-Counter Compress Charts for Comparison

The charts below indicate the performance data for two alternative compresses. Note the significant difference in both temperature and relative humidity which is ineffective and potentially harmful to the eyelids.

Made from silicone, the Onyx and Quartz offer patients another nighttime shelter option. They rest inside the orbital bone and gently keep leaking air and drafts out while creating a humid environment during rest. The Onyx and Quartz are available with the secure strap (recommended for use with the CPAP) or with our standard head wrap. The shields are hypoallergenic and latex free.

**EyeSeals™ Nighttime Shelter**

Sleep Apnea, a serious and common disorder affects more than 18 million Americans. One widely prescribed treatment is the use of a CPAP mask. Many of these masks are worn snugly over nose and mouth, to provide a continuous pressurized flow of air into the sleeper’s throat. The increased air pressure prevents the airways from collapsing. Although the CPAP provides much needed relief to sleep apnea sufferers, it has side effects. For many, the mask leaks air at night, causing eye dryness, discomfort and disruptions in sleep. This is of significant concern for any CPAP users who have ocular exposure issues. Designed specifically for use with CPAP’s, the EyeSeals® are skin soft and made from a food-grade thermal plastic. The orbit cavity is deep enough to allow for comfortable blinking. A protective ridge has been added above the nose to further improve patient comfort by preventing the CPAP mask from chaffing skin. The EyeSeals® are hypoallergenic and latex free.

**How it Works**
- The unitary design gently rests over the orbital bones, sheltering eyes from drafts or leaking air while also fogging up, creating a moisture rich environment for the eyes, eyelid and surrounding skin.

Tranquileyes™
Moisture Release Eyewear

Tranquileyes™ Moisture Release Eyewear offers patients a new level of dry eye and allergy relief. Developed and patented by a Board Certified Ophthalmologist, the Moisture Release Eyewear incorporates an ingenious technology to stabilize the tear film, improve visual acuity and ease symptoms of eye dryness, redness and fatigue.

Comfort Wherever You Are

The stylish, lightweight frames utilize two removable vented cartridges which serve as a reservoir. The cartridges are soaked in water then placed into the side of the frame. A comfortable thermal plastic gasket and bendable nose bridge seal the area around the eyes, protecting them from wind, dust and pollen. When eyewear is worn, the water from the cartridges evaporate, increasing the relative humidity around the eyes, helping to stabilize the tear film. The therapeutic environment minimizes dry eye symptoms, improves comfort, reduces fatigue and improves visual acuity—indoors and out. The polycarbonate lenses are coated with anti-fog for maximum comfort and all sunglasses provide 100%, UVA and UVB protection.

Your Eyes Will Feel Really Special, No Matter Where You Are.

How it Works

With a bendable nose bridge, soft rubber gasket and hidden moisture reservoirs, our patented and sleek design wraps around the eyes with comfort, sealing in the moisture, slowing the evaporation of tears, creating the needed humid environment to alleviate dry eye.
Skin Therapy

Eye Eco offers a line of skin therapy products uniquely different than other skin products. All are developed with the eyes in mind and specifically formulated to be hydrating and non-irritating to the eyes.

Tea Tree Foaming Facial and Lid Cleanser
Our Foaming Facial Cleanser is a big hit for those with sensitive skin. Infused with Tea Tree, Chamomile and Shea Butter, this cleanser gently removes all dirt and make-up without drying the skin. The Tea Tree helps reduce blemishes and the Chamomile and Shea Butter deeply hydrate. The cleanser is formulated to be non-irritating for the eyes. Skin is left feeling smooth and silky. Safe to use twice daily.

6oz, 180mL
270± applications
1.7oz, 50mL
90± applications

Soothing Eye Mist
Specially formulated for use around the eyes, the soothing eye mist is unscented, non-irritating to the eyes and hydrating for the eyelid. Use as a substitute for water when creating Tranquileyes moist-heat or cold therapies. Also recommended for use with silicone shields.

2oz, 60mL
90± applications

Essential Nine Eyelid and Skin Therapy
Essential Nine is formulated to be applied directly on the eyelids and sensitive surrounding skin. The eyelid, the thinnest skin on the body, is designed to protect and hydrate the ocular surface. The eyelid can dry easily causing puffiness and discomfort to the eyes. Essential Nine includes Aloe, Chamomile, and Green Tea with clinically proven active ingredients: Eyeseryl to reduce eyelid and under eye puffiness, Regu-Age® proven to reduce dark circles by 35%*, Gatuline® proven to reduce redness and deeply hydrate fine lines, and Pentavitin® which ensures instant, deep hydration that lasts for 12 hours.
E9 is unscented, non-irritating and absorbs quickly, leaving the skin feeling silky and smooth.

*after eight weeks of use, twice a day

Relax, Puffy Eye and Age Defense
Enhance the benefits of Tranquileyes® moist-heat and cold therapies with one of three specially formulated botanical water formulas. Simply mist over the face or over moisture pads prior to wearing the Tranquileyes® goggles. Each water formula addresses a specific benefit. All include active ingredient of Allantoin and Aloe to intensely hydrate skin. All are formulated for maximum comfort and non-irritating to the eyes.

Relax Formula — Lavender
Relax formula is infused with soothing lavender essential oil to calm your mind and ease stress.
2oz, 60mL, 90± applications

Age Defense Formula — Honeysuckle and Green Tea
Age defense formula combines green tea, vitamin C and honeysuckle to help protect skin.
2oz, 60mL, 90± applications

Puffy Eye Formula — Cucumber
Puffy eye formula is infused with the moisturizing and anti-inflammatory benefits of cucumber and aloe.
2oz, 60mL, 90± applications
